ABOUT ME

Computer Science undergraduate from VIT Bhopal with hands-on experience in full-stack development using Angular, Node.js, and Python. Strong foundation in Java, SQL, and problem-solving, with projects in AI and secure banking systems. Passionate about building scalable tech solutions and continuously learning in dynamic environments.

ACADEMIC PROJECTS

FETAL HEALTH AI

Python | Machine Learning

- Developed a system to detect potential fetal health issues using machine learning techniques.
- Used Python, Scikit-learn, Pandas, and Matplotlib to build and visualize the system.
- Improved model accuracy via feature selection, cross-validation, and hyperparameter tuning.
- Achieved 95% accuracy on test data.

FULL-STACK BANKING WEB APPLICATION

Angular | NodeJS | MySQL

- Built a secure and responsive banking web app using Angular (frontend) and Node.js with Express (backend).
- Integrated RESTful APIs and JWT-based authentication for secure access.
- Implemented core features like account creation, balance checks, and fund transfers.
- Managed user/transaction data in MySQL with role-based access and password encryption.
